

With new federal regulations limiting reimbursements for hospital-acquired infections (HAIs) looming on the horizon, B. Braun Medical Inc., the Infusion Nurses Society (INS), and the Massachusetts Hospital Association (MHA), will host a Webinar series in September to equip nurses and hospital managers with best practices that can help prevent the spread of infections in their facilities.

The two part-Webinar series, titled “New CMS Ruling: The Impact on Health, Hospitals, and Infusion Therapy,” is scheduled for September 4 and September 16 and comes in response to a Centers for Medicare & Medicaid Services (CMS) rule that will take effect on October 1. The rule prohibits payment to hospitals for care required to treat several types of HAIs.
