

BAPEN (the British Association for Parenteral and Enteral Nutrition) has invested in updating its virtual learning environment (VLE) platform and a range of e-learning modules that have been specifically designed to support nutrition education for health professionals” Relph (2016).

Extract:

“BAPEN (the British Association for Parenteral and Enteral Nutrition) has invested in updating its virtual learning environment (VLE) platform and a range of e-learning modules that have been specifically designed to support nutrition education for health professionals. Many of the modules are free to those who work in the NHS, the others have a nominal fee. Although appropriate for all professions, it is particularly worth noting that they are a great opportunity for undertaking study that can be used and reflected on in practice as part of the Nursing and Midwifery Council (NMC) revalidation process” Relph (2016).

ReTweet if useful... E-learning as a method of for nutrition and hydration training
