Intravenous literature: News Medical report “Denise Macklin, BSN, RNC, representing the research team of Dr. Cynthia C. Chernecky Ph.D., RN, AOCN, FAAN, Dr. Jennifer Waller, Ph.D., both from Georgia Health Sciences University; and Dr. William Jarvis M.D., Jason & Jarvis Associates, exhibited a poster at the recent APIC 2011 (Association for Professionals in Infection Control and Epidemiology) conference in Baltimore, titled “Clinical Comparisons of Split Septum, Positive and Negative Mechanical Valve Intravenous Connectors to an Intraluminal Protection Connector on Infection Rates.” This comparative effectiveness study shows the success of RyMed Technologies’ InVision-Plus® Intraluminal Protection System versus all IV connector classes including split septum, negative and positive.”
