...patient on catheter-dependent dialysis in whom a translumbar Hemodialysis Reliable Outflow (HeRO) graft...” Loskutov et al (2018).

Extract:

“We report a case of a 30-year-old end-stage renal disease (ESRD) patient on catheter-dependent dialysis in whom a translumbar Hemodialysis Reliable Outflow (HeRO) graft (Merit Medical Systems, South Jordan, UT) was successfully placed for long-term hemodialysis after multiple vascular access modality failures.”
