The use of elastomeric pumps to deliver intravenous (IV) antibiotics can have many benefits for OPAT services; they are cost-effective, easy to use and allow the patient to be fully ambulant” Oliver (2016).

Abstract:
Outpatient parenteral antibiotic therapy (OPAT) is a growing area of practice that has numerous benefits for both patients and the healthcare system. In order for OPAT services to be successful, strategies need to be in place to maximise efficiency while providing safe, high-quality care.
