

We developed a questionnaire to assess the knowledge and practice of nursing staff, patient care assistants, phlebotomists, and laboratory technicians regarding blood culture collection and contamination...” Nair et al (2017).

Abstract:

We developed a questionnaire to assess the knowledge and practice of nursing staff, patient care assistants, phlebotomists, and laboratory technicians regarding blood culture collection and contamination at 2 tertiary care academic centers. Our study showed there were several gaps in knowledge and practice regarding obtaining blood cultures.

ReTweet if useful... What is your knowledge of blood culture contamination?
