Deltec Gripper non-coring needles and PORT-A-CATH trays containing Gripper needles – recall due to risk of needle occlusion. Manufactured by Smiths Medical: due to a manufacturing process failure, needles may be occluded, potentially causing a delay to treatment” MHRA (2019).

Extract:

Deltec Gripper non-coring needles and PORT-A-CATH trays containing Gripper needles - recall due to risk of needle occlusion
Manufactured by Smiths Medical: due to a manufacturing process failure, needles may be occluded, potentially causing a delay to treatment. If a GRIPPER needle is occluded, it will need to be replaced, which will delay the start of therapy. MHRA is publishing this alert to ensure that all hospitals are aware of the issue and that adequate action is taken to mitigate risks to patients.
