Mark Buckley, Vascular Access Product Manager at Kimal PLC said “It is well documented that traditional catheters can cause a number of risks to patients. Altius RT Acute doesn’t compromise on patient safety, it’s manufactured using our unique Multi-Tube™ Technology and a soft, flexible PUR material. Eliminating the risk of the catheter kinking and creating stable, consistent flow rates, which is ideal for critical patients who require RRT”

Altius RT Acute also provides a closed system, from kit to catheter with integrated LuerSafe connectors which eliminate the need for clamps and protect the patient from accidental
